

2022 TRIPLE - FUNCTION REBATE

up to **\$900**

On Tranquility® Water-to-Water Unit And Packaged/Split Combo Purchases!

That's right. Purchase a Tranquility® Water-to-Water and Packaged/Split system combination up to 7.5 tons total in place of a competitor's triple-function system and receive up to a \$750 rebate! The rebate will be up to \$900 if the total capacity is 8 tons or more! Simply scroll down to access the rebate form.

Act soon because this is a limited-time offer!

Tranquility® Packaged and Split Series

Available for Tranquility® 22 and Tranquility® 30 Packaged Series Geothermal Water Source Heat Pumps. The Tranquility Packaged Series is designed for both new and retrofit applications. Its narrow cabinet design allows for easy movement through doorways, crawl spaces, and attic accesses. These Tranquility Series units utilize Earthpure® HFC-410A refrigerant, two-stage scroll compressors, microprocessor controls, and allow the Tranquility Series to operate at the most efficient levels.

The Tranquility Split Series has among the highest efficiency ratings of any geothermal split system in the industry when matched with ClimateMaster Tranquility Indoor Air Handlers or Cased Coils. The Tranquility Split Series easily connects to new or existing fossil fuel and electric furnaces. The indoor split series is ideal for remote applications with a second floor or crawl space. The outdoor split series features weather and sound-insulated cabinets for quiet operation.

Tranquility® Water-to-Water Series

The TBW*/TCW Water-to-Water Series offers a wide range of units for most any installation with an extended range refrigerant circuit capable of ground loop (geothermal) applications. The TBW/TCW Series can be used for radiant floor heating, snow/ice melt, chilled water for fan coils, potable hot water generation, hot/chilled water for make-up air and many other types of HVAC applications. The TBW/TCW Water-to-Water Series offers an extended range refrigeration circuit, capable of ground loop (geothermal) applications. Unique application-specific controls make the TBW/TCW Series ideal for hydronic heating and domestic hot water generation.

* TBW - Closed Loop Applications Only
