

Right Click on the GeoDesigner Installer and select “Run as Administrator.”

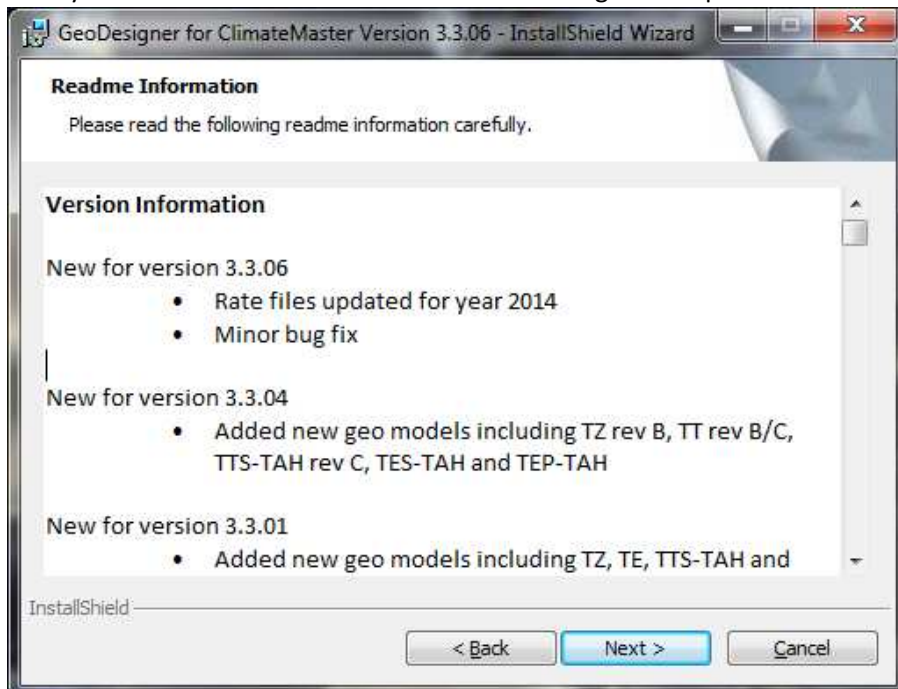

Supply admin password (if needed) and Click the “Yes” button to continue installing.

Next Read the EULA and if you accept the Terms of Use, click the radio button “I accept the terms in the license agreement” and click “Next.”

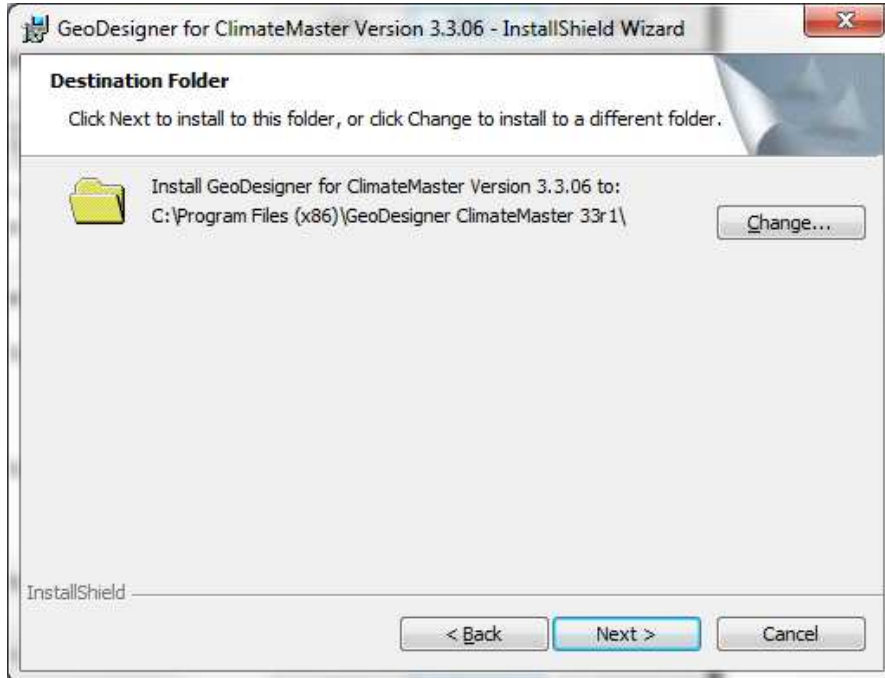

Next you will see a screen that shows version changes and updates.

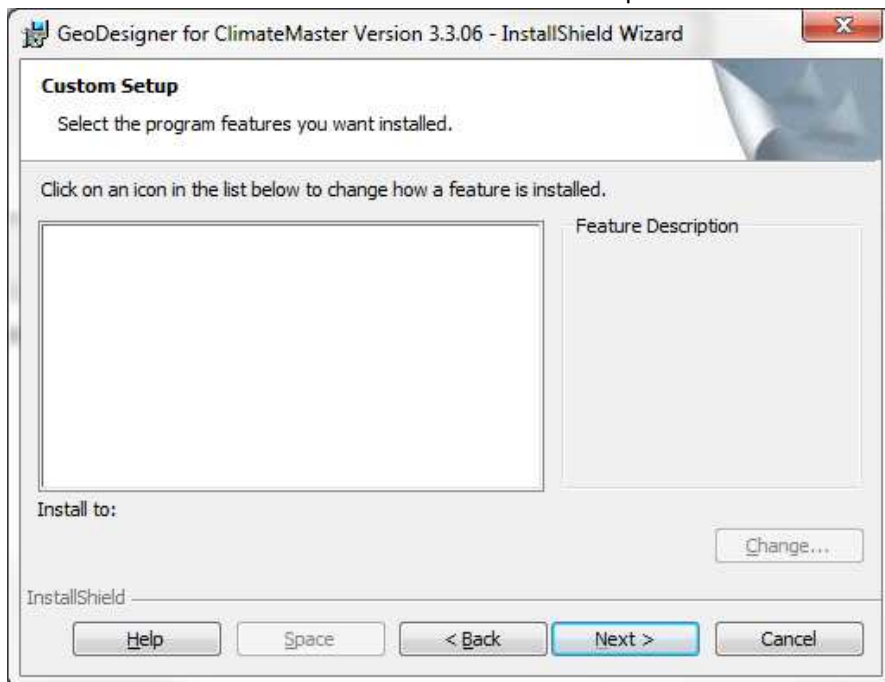

After reviewing click “Next.”

Next is the Installation path. You can change the path name if you like 33r1 doesn't really reflect the installation version but not necessary. But only change the 33r1 to something like the version number 3306.

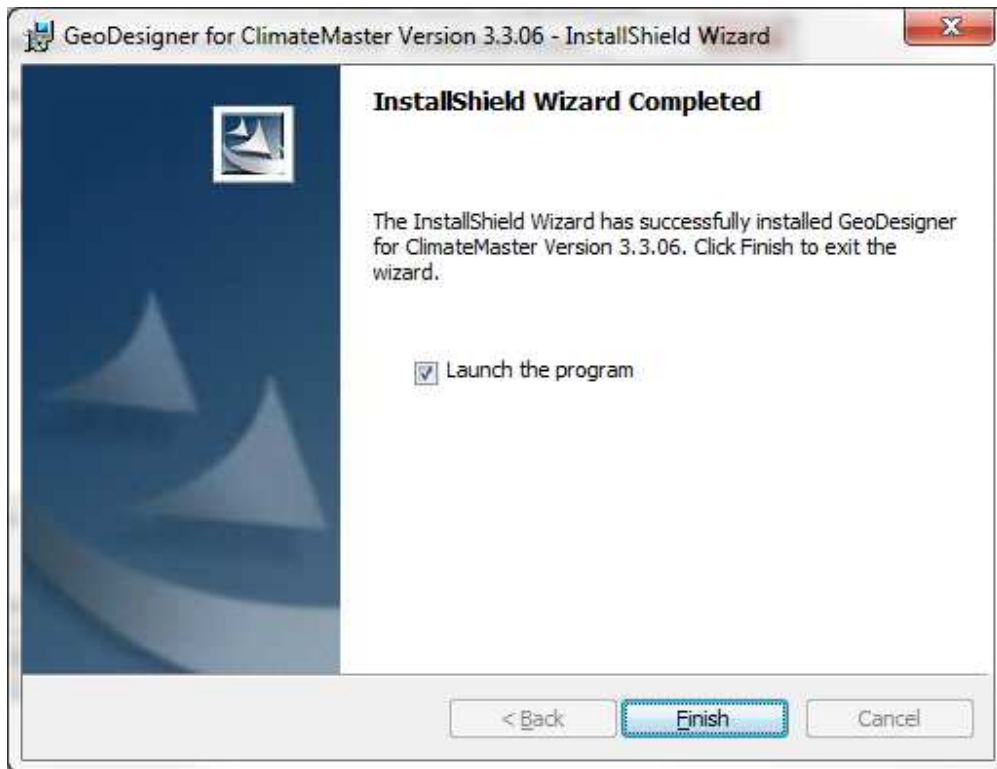

After deciding the install path click "Next" to continue.

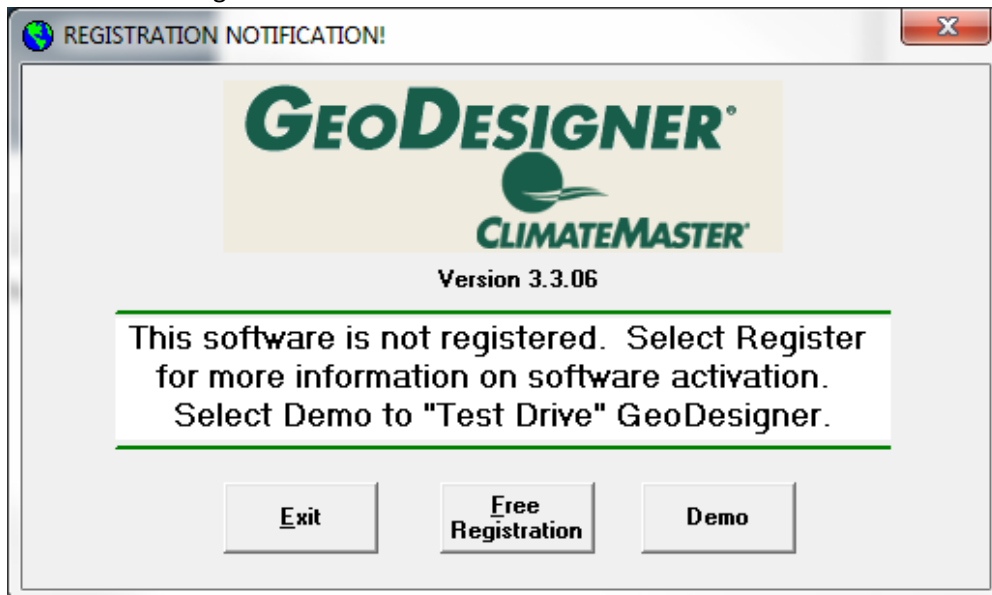

Not much to do on this screen but to click "Next." So please do.

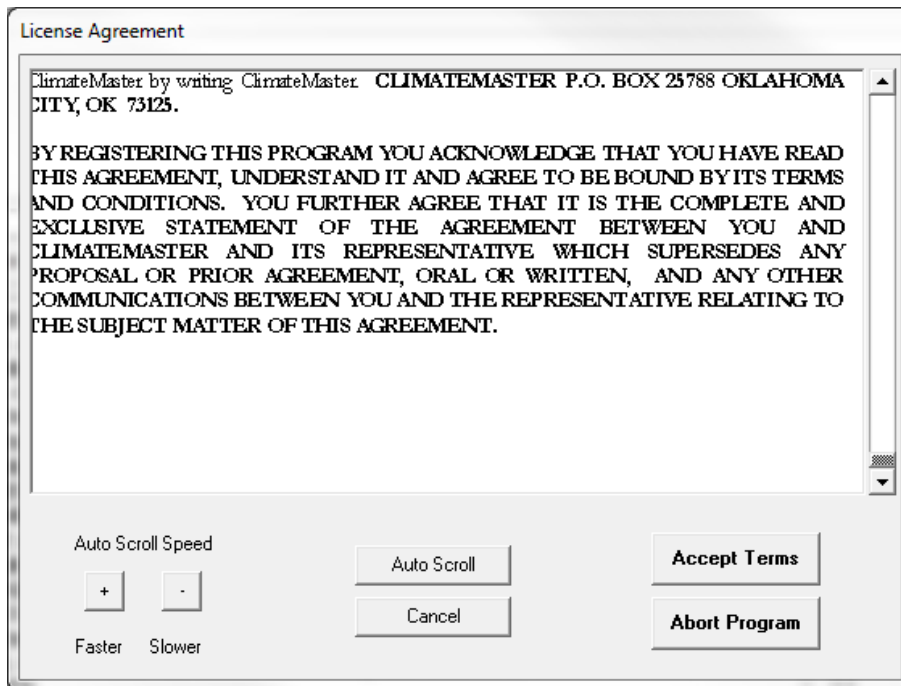

After it installs keep the checkbox checked and click “Finish” to launch GeoDesigner.

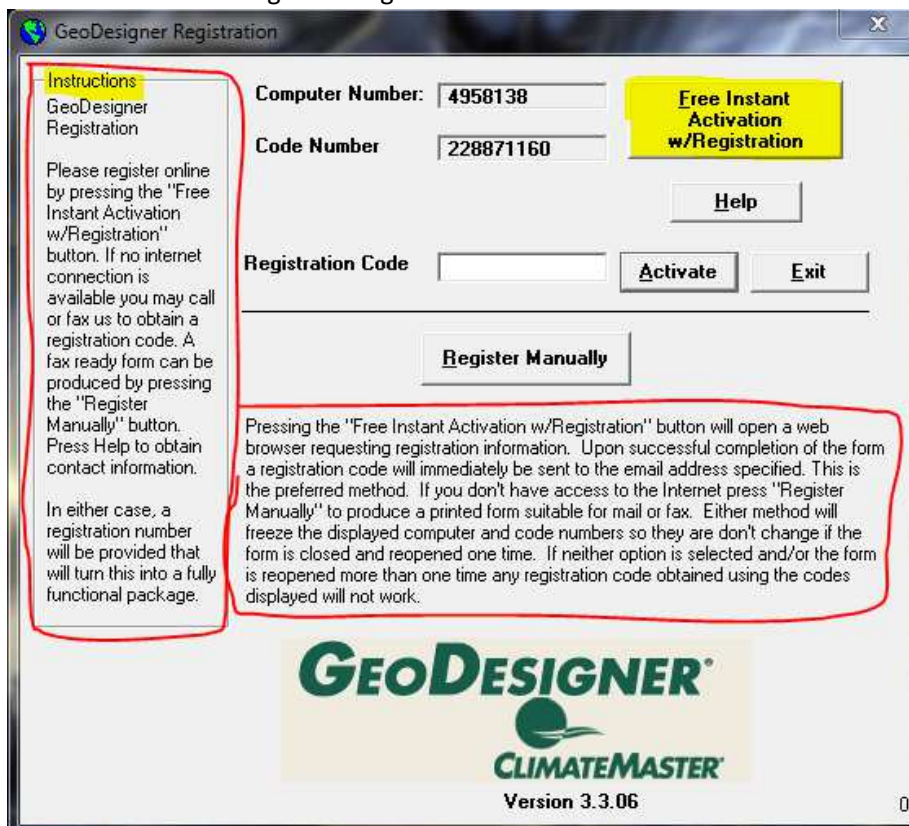

Click the “Free Registration” button.

The GeoDesigner EULA scrolls by itself to the end before you can "Accept the terms." Please do.

Please READ the instructions on the next page, in the left column and down under "Register Manually" to understand how to get the registration codes and the best method for doing so.

Clicking the “Free Instant Activation w/Registration” brings you to a webpage where you can register and receive your activation code. Fill out the required fields and click “Submit.”

## GeoDesigner Registration

\* Indicates Required Field

\* First Name

\* Last Name

\* E-mail

\* Address

\* City

\* Country

\* State

\* Postal Code

**Notice**

Registration Process Complete--Please Restart Application

OK

After restarting please click "I agree" to start the application.

When program launches you will have to access to "Create New Project," "Open Existing," "Check for Program Updates." I've highlighted my version number at the time of this writing, that it is current and up to date.
