# Trilogy 45 (VE) Series

## Overview

### OVERVIEW

Trilogy 45 is the next revolution in residential energy efficiency and will set ClimateMaster dealers in a class of their own in the home heating and cooling market. It is the first geothermal heat pump ever certified by AHRI to exceed 45 EER and is 47% more efficient than any other geothermal heat pump available today.

The Trilogy VE far exceeds the capabilities of any other HVAC unit on the market today with the three significant differentiators:

1. The fully variable system exceeds **45 EER** (highest in industry), driven by a variable speed compressor, fan and pump (the Trilogy).
2. The **MOST INTELLIGENT** system in the residential industry with **Advanced Monitoring and Diagnostics**. The communicating control monitors smart sensors across the unit to display operation, faults and possible causes in **PLAIN ENGLISH** on the thermostat, laptop software tool and on a web portal.
3. **Web-enabled configuration and diagnostics** not only provides dealers to web access the Trilogy's real-time operating data and fault information, but, also make changes to configuration of the unit from any web-enabled computer or tablet.

The Trilogy is a packaged water-to-air system that far exceeds ENERGY STAR Tier 3 efficiency levels. Trilogy is available in two models, with the capacity range of the first model between 9K–30K and the second model between 18k–60k BTUH.

### FEATURES

#### Ultra-High Efficiency

The revolutionary new Trilogy utilizes variable speed technology matched with communicating controls and a micro-channel air coil to deliver the highest efficiency (45 EER+) in the industry. It also delivers an extremely wide range of heating and cooling capacities, with the ability to perfectly match loads to as low as 30% of maximum, thus delivering ultra-high efficiency and low operating costs. Due to the wide range of operation, it can also completely eliminate the use of auxiliary heat even in far Northern climates.

#### Ultimate in Comfort, Humidity Control and Low Sound Levels

In addition to efficiency, the Trilogy delivers unsurpassed comfort and humidity control by precisely matching capacity to the heating and cooling load while also operating at very low sound levels. It provides better humidity control compared to any system in the market by controlling the air coil temperature, modulating the variable speed fan, and running longer to increase moisture removal.

#### iGate Advanced Monitoring and Diagnostics On the Web

Trilogy is THE MOST INTELLIGENT residential unit in the market with Advanced Monitoring and Diagnostics. The communicating control monitors unit operation from 15 sensors in the unit to display operation, faults and possible causes in PLAIN ENGLISH.

If a fault occurs, the homeowner will first see a "Service Needed" on the thermostat, along with dealer name/ phone number, fault condition and possible causes. The homeowner can then relay this information to their dealer and the dealer can access the **real-time operating information on a web portal** and make configuration adjustments from the web. The unit can be configured and diagnosed from the thermostat or using a laptop service tool as well.

If the issue requires the dealer's attention, the dealer can put the thermostat in Installer Mode in order to:

1. Obtain the fault description and possible causes.
2. Read the conditions AT THE TIME OF THE FAULT across all aspects of the unit (water circuit, refrigerant circuit and air circuit) to determine the cause.
3. Manually operate the unit, from the thermostat or laptop service tool, to isolate the issue.

The system electronically measures, calculates and displays:

1. Refrigerant circuit:
  - Superheat, Subcool
  - Suction pressure/temperature, discharge pressure/temperature, refrigerant temperature at entering / leaving the source coil and air coil
  - Compressor speed
  - Electronic Expansion Valve operation
2. Water circuit / loop
  - Entering/ Leaving water temperature
  - Water flow rate
  - Loop pressure
  - Internal Pump speed
3. Air section
  - Airflow CFM and blower RPM
  - Leaving air temperature
4. Other information
  - Internal pump speed

# Overview

## iGate ClimaZone™

This optional addition to the Trilogy is a zoning system (AZC06CAR) that allows a single unit to be controlled by multiple iGate Connect thermostats, conditioning the home in smaller zones instead of a single large zone. The Trilogy system accommodates six zones with a single zone panel or up to twelve zones with the addition of a second panel. With zoning a home is more comfortable and the HVAC system more efficient by directing conditioned air only when and where it is needed giving the homeowner complete control over their cooling and heating. System configuration and diagnostics are available via the Trilogy PC service tool.

## PC / Laptop Service Tool

To help crunch all the operating and fault data coming out of the Trilogy unit, ClimateMaster offers a PC/laptop tool to configure and diagnose the system. PC/laptop loaded with the software plugs in to the EXM board using an optional cable to help download and analyze the data.

## iGate Web-Enabled Configuration and Diagnostics

Trilogy has industry-exclusive two-way communicating controls, which allow for communication between smart components/sensors, the board, and the web-enabled thermostat. For installing and servicing contractors, this means **unprecedented ease of setup and troubleshooting through the dealer portal on the internet**. The unit uses this technology to monitor every aspect of system operation to ensure peak performance. This unit is so advanced, it requires minimal configuration at start up and it easily tells the homeowner/contractor if something is wrong.

### Digital Communicating Control Features:

- Communicating interface to compressor, web-enabled thermostat, fan motor and geo source pump
- Comprehensive setup and diagnostics via system thermostat, PC service tool, and the internet
- High pressure, loss of charge, freeze and condensate overflow protection
- Intelligent fault retry with history retention
- Service tool port for optional setup and diagnostics at unit
- Auxiliary relay outputs for accessory connections

### Thermostat interface:

#### Configure / setup:

- Minimum setup required as the unit self-adjusts air and water flow to demand
- Accessory configuration
- User-configurable utility demand reduction

#### Monitor (displayed on thermostat):

- Blower CFM, air temperature and RPM
- Water entering/leaving temperature, loop pressure and flow (GPM), geo source pump speed
- Refrigerant pressure/temperature (at compressor suction/discharge, at Air coil, at water coil)
- Calculation and display of SuperHeat, SubCool

### Diagnose (on thermostat):

- Fault description, possible causes
- System status at time of fault (all temperature, pressure, flows)
- Diagnostic display of system inputs, outputs, and configuration settings at thermostat
- Immediate manual control of EXM outputs at thermostat for rapid troubleshooting

## Internal Variable Water-Flow Control

The Trilogy offers integrated variable speed source control

for ground loop geothermal applications, which includes:

three-way flush valves and ports, expansion tank, high efficiency variable-speed pump, transducers and a communicating system to display this information. The system provides optimal geothermal source flow to maximize overall system efficiency and performance for each operating mode.

Installers can now directly connect the source loop to the unit, which decreases the labor involved with installing a bulky external pumping module. The variable speed pump, part of the "Trilogy" system, also provides homeowners significant operating cost savings by consuming fewer watts than fixed speed external pumping modules. As vFlow matches flow to the unit operation and the Trilogy unit operates at lower speeds most of the time, the savings from vFlow on the Trilogy are even greater than Tranquility two-stage units with vFlow.

Other new features include, flow & temperature and pressure & temperature transducers for monitoring the source water. These allow more accurate loop water measurements and allow for easier troubleshooting of source loop issues.

## Dealer-Friendly Cabinet and Swing-out Control

The cabinet for Trilogy has been designed with the dealer in mind. A unique swing-out control box and thoughtful internal layout allow nearly all servicing from the front access panel. For items requiring access from other sides, just three more panels give a dealer full access to any component in the unit. The low voltage panel can even be quickly pulled off the hinges and removed. Harness connections make controller replacement a snap.

Of course, majority of the unit troubleshooting can be done at the thermostat, web portal or using the PC/laptop service tool, keeping the technician out of tight spaces. Since geothermal source functions are integrated within the cabinet, there is no additional space required for bulky external pumping modules.

# Trilogy 45 (VE) Series

## iGate® Web-Enabled Communicating Controls

**iGate® Information gateway to monitor, control and diagnose your system – on the internet through a computer or mobile device**

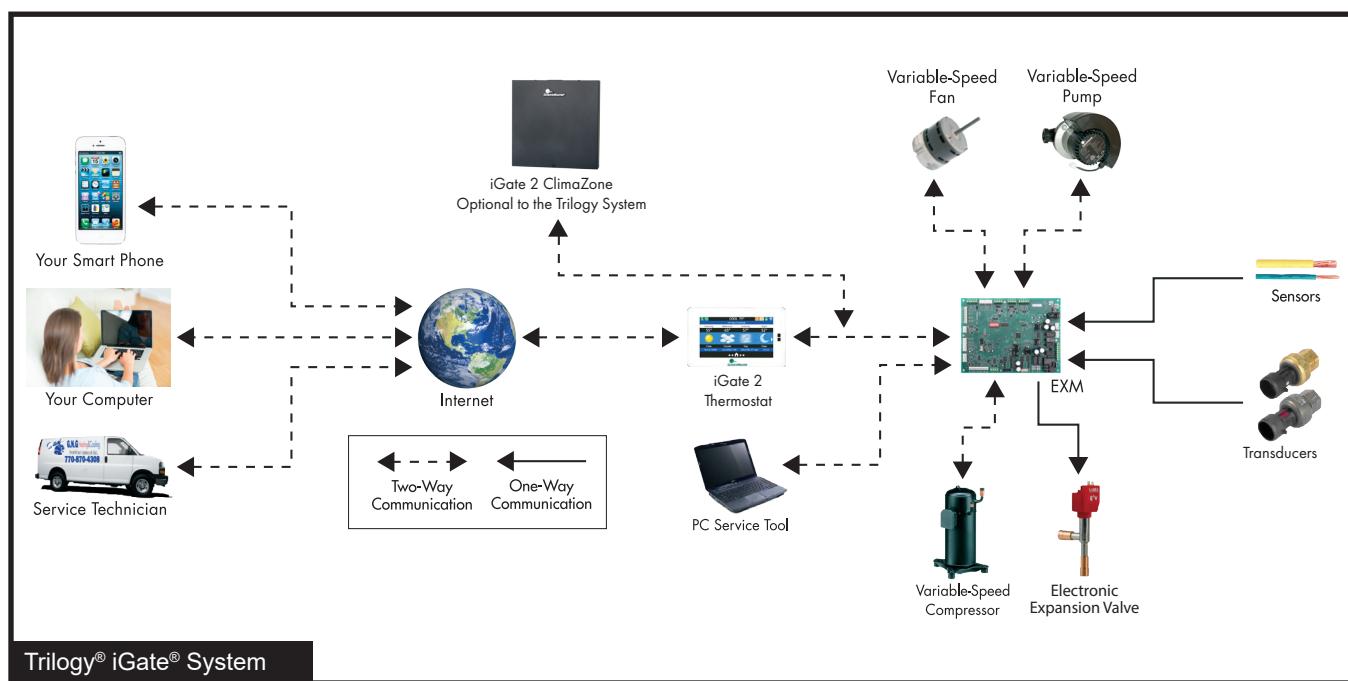

The Trilogy® 45 is equipped with industry-first, iGate® Connect – Web-enabled Information Gateway – a 2-way communicating system that allows users to interact with their geothermal system in plain English on the thermostat / internet AND delivers improved reliability and efficiency by precisely controlling smart variable speed components. iGate makes the Trilogy series easiest geothermal products to install and service.

**Monitor/Configure**—Installers can configure Trilogy® units from the thermostat, PC service tool or dealer portal on the internet, including max/min unit capacity, airflows, water  $\Delta T$ , etc. Users can look up the current system status: temperature sensor readings and operational status and resulting performance information, in plain English on the AWC99 thermostat, PC Service tool or dealer portal on the internet.

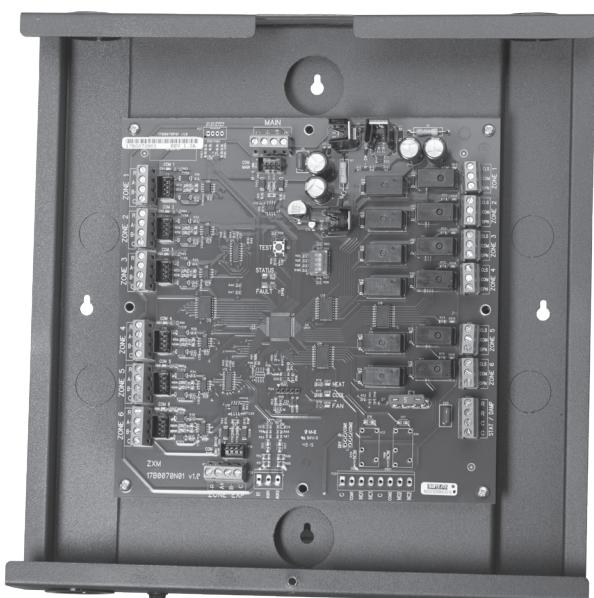

**Precise Control**—The new EXM board enables intelligent, 2-way communication between the EXM board and smart components like the communicating thermostat, fan motor, Compressor, Electronic Expansion Valve and water pump. The Intelligent EXM board uses information received from the smart components and sensors to precisely control operation of the variable-speed fan, compressor and water pump to deliver the highest efficiency, reliability and increased comfort.

**Diagnostics**—iGate® takes diagnosing geothermal units to the next level of access and simplicity, by providing a dashboard of system and fault information, in plain English, on the iGate Connect thermostat, PC service tool and the dealer portal on the internet. iGate Service Warning warns the homeowner and dealer of a fault and displays fault descriptions by email and possible causes and current system status on the dealer portal on the internet. In iGate Service Mode, the service personnel can access fault descriptions, possible causes and most importantly, conditions (temp, flow, i/o conditions, configuration) at the time of the fault and at the time of the call. Manual Operation mode allows the service personnel to manually command operation to help troubleshoot specific components. With the iGate communicating system, consumers and contractors have a web-enabled gateway to system information never before available.

**iGate® ClimaZone™ Zoning Panel**

**iGate ClimaZone** is the the zoning panel used with the Trilogy® System and the iGate Thermostat.

## Features

- Designed for use with Trilogy System
- Compatible with new and existing Trilogy systems
- One unit accommodates up to six zones with a single zone panel or up to twelve zones with two zone panels
- Each zone may have up to 3 dampers (purchased separately)
- iGate Connect thermostat controls each zone and provides internet-connected communications
- System configuration and diagnostics available via ClimateMaster Trilogy PC Service Tool

## Application Flexibility

### Zoning Components

- iGate ClimaZone Zone Panel – up to 2 per Trilogy system
- iGate Connect Thermostat – 1 per zone
- Zone Damper – up to 3 per zone
- Transformer – for damper and thermostat power
- Trilogy PC Service Tool Outdoor Temperature Sensor
- Indoor Remote Temperature Sensor
- Wall Mounted Remote Indoor Temperature sensor

# Trilogy 45 (VE) Series

## iGate® Connect

**iGate Connect features a variety of ways to access and control your Trilogy Geothermal Heating and Cooling System.**

### Web-Enabled Home Thermostat

- Communicates personal settings and reminders through the iGate communication system
- Easy to use, full color, high resolution interface
- Receives notification for routine maintenance
- Sleek, intuitive button control
- Secure internet connection keeps your information private
- Contains Trilogy unit model, serial number and dealer contact information
- Service and system performance information is stored in the thermostat, increasing the accuracy of diagnosis

### Web Portal Accessible Any Time, Any Where

- Remote login from anywhere, anytime from any device and adjust settings
- Set personal schedule by day, week or month including those times when you will be away from home for vacation or business
- Information is remotely available (if you wish) to your dealer through a dealer portal for remote troubleshooting and diagnosis.
- Secure internet connection keeps your information private
- Access your thermostat with Android and iPhone mobile apps

## Trilogy® PC Service Tool – Exclusively Available on Trilogy

To help utilize the considerable data generated by the Trilogy and make configuration, monitoring and diagnostics easier, ClimateMaster has developed the Trilogy Service Tool for PC.

The service tool software installs on a PC / laptop.

Connect the PC to the EXM board in the Trilogy using the cables from service tool kit ASVCTOOL01.

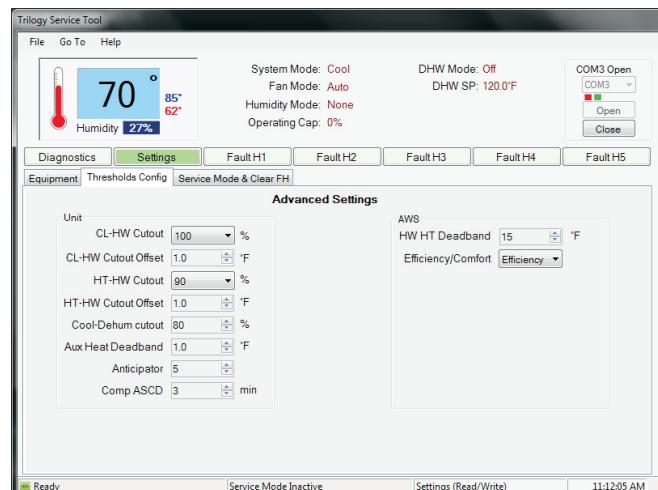

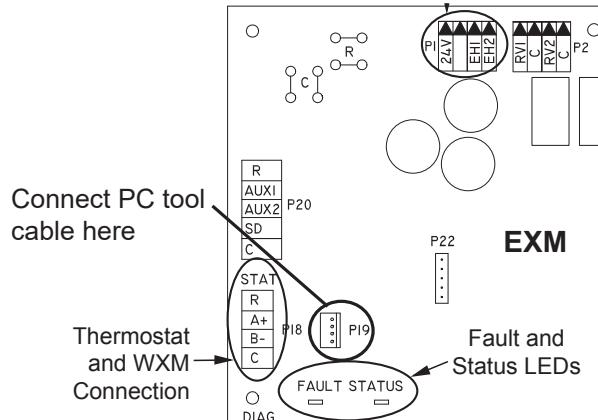

From the software you can:

1. Update the software on the EXM board using the bootloader.
2. Configure, diagnose and manual operation of the Trilogy from the service tool.

### Configuration:

The service tool software includes three pages of configuration data for your Trilogy and the following are values that can be configured on these pages:

1. Equipment
  - Unit family, blower type, loop config
  - Loop delta T; single/parallel; Anti-freeze
  - Capacity: Min/Max Cool/Heat
  - Airflows
  - Serial # updates
  - Aux. heat operating mode
2. Thresholds (limits)
  - Cooling-Dehumid cutout
  - Anticipator
  - Compressor ASCD minutes
3. Service mode/ clear fault history
  - Enter service mode
  - Manual operation:
  - Operating mode
  - Target airflow
  - Loop pump speed
  - Clear Fault History

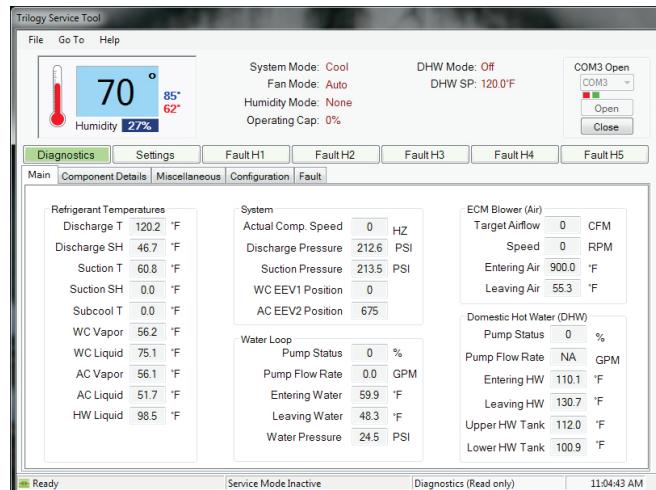

# Trilogy 45 (VE) Series

## Trilogy® PC Service Tool – Exclusively Available on Trilogy

### Diagnostics / REAL-TIME operating data:

The service tool software includes five pages of configuration data for your Trilogy and you can get all readings and calculated values in REAL TIME from the EXM board. The following are values that can be viewed on these pages:

1. Calculations
  - Discharge Superheat
  - Suction Superheat
  - Subcooling
  - HR/HE
  - Loop Pump Watts
  - Current % Capacity
2. Sensor values
  - Space Temp
  - Space Humidity
  - Discharge Pressure
  - Discharge Temp
  - Suction Pressure
  - Suction Temp
  - Air Coil Liq Temp
  - Air Coil Vap Temp
  - Loop Water Coil Liq Temp
  - Loop Water Coil Vap Temp
  - Loop Entering Water Temp
  - Loop Leaving Water Temp
  - Loop GPM
  - Loop Pressure
  - Loop Pump Speed
  - Loop Pump Return
  - Fan CFM
  - Fan RPM
  - Fan Watts
  - Leaving Air temperature
  - Target Compressor Speed
  - Compressor Current
  - Inverter Current
  - Inverter DC Bus Volt
  - Inverter Sink Temp
  - Compressor Watts
  - Electronic Expansion Valve1 Step
  - Electronic Expansion Valve2 Step
  - Reversing Valve1 Status
  - Reversing Valve2 Status
  - Ambient Cabinet Temp
  - EXM Control Voltage
  - Dip switch status

### Fault Codes

The service tool software includes five pages of data for every fault code and saves up to 5 fault codes. You can get all readings and calculated values in AT TIME OF FAULT from the EXM board.

## myUplinkPRO Web Portal

ClimateMaster has taken the convenience of monitoring, configuring and diagnosing the Trilogy to the next level by making all unit operating information available on the Internet through the web portal.

The myUplinkPRO web portal is your gateway to all your iGate® 2.0 Connect thermostats.

### Configure

Change settings of 25 adjustments in the Trilogy – from the INTERNET! These adjustments include:

- Airflow (min/max for every mode)
- Capacity (min/max for every mode)
- Delta T (cooling, heating)
- Blower off delays
- Compressor short cycle time
- Loop pump – single unit or multiple on one loop (parallel)
- Aux heat deadband

**System Menu**

Could not connect to device. Some functionality may not be available.

**2.1 - Configuration**

- 2.1.1 - Unit Configuration
- 2.1.2 - Unit Configuration - Capacity
- 2.1.3 - Unit Configuration - Threshold
- 2.1.4 - Unit Configuration - Blower
- 2.1.5 - Unit Configuration - Loop
- 2.1.6 - Unit Configuration - Option

**Main Menu**

- Status
- Notifications
- Main Menu**
- History
- Devices
- System Flow
- Customer Info
- About Manufacturer

**Select System**

**iGate brazing new**

**Back**

### Monitor

Monitor diagnostic data points – real time. The system also stores data at 5 minute increments for the last 3 days of operation.

Examples of data available on the dealer portal is:

- Superheat / subcool
- HE/ HR
- Current compressor % capacity
- Loop entering and leaving water temperature; Loop flow (GPM); Loop pressure
- Refrigerant temperature at
  - Air coil
  - Loop water coil
- Compressor suction + discharge temperature and pressure
- Loop pump speed, return and watts (watts calculated)
- Fan CFM, RPM and watts; Leaving air temperature
- Compressor speed, current, inverter current, inverter sink temp, compressor watts, EXM control voltage
- Expansion valve step and reversing valve status
- Cabinet ambient temp

**System Flow**

**Heating**

Legend for sensor types:

- High Pressure Hot Gas
- High Pressure Hot Liquid
- Low Pressure Hot Gas
- Low Pressure Hot Liquid
- High Temperature Circuit
- Water Supply Line

**Select System**

**iGate2.0 - Vidya**

# Trilogy 45 (VE) Series

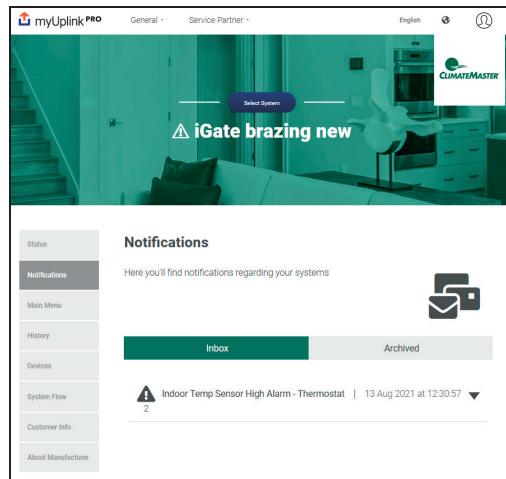

## myUplinkPRO Web Portal

### Diagnose

Last 5 fault codes and operating condition are saved on the EXM and communicated to the dealer portal. You can then reference the troubleshooting smart phone app (see section below) to find possible causes and instructions on fixing the issue.

### Smart phone App

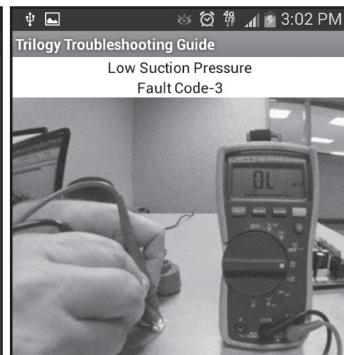

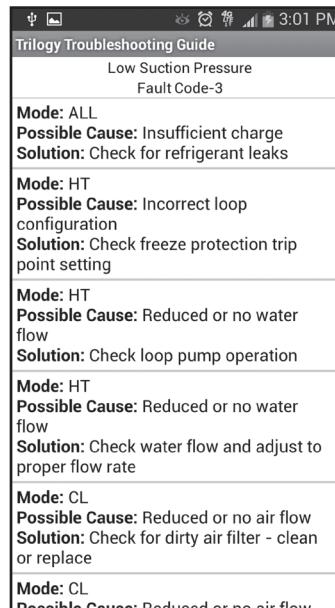

The Climatemaster Trilogy Troubleshooter allows GeoElite service technicians access to the latest, web-based information\* on any of the possible fault causes, as well as troubleshooting tips and possible solutions for the Trilogy Variable Speed heat pump.

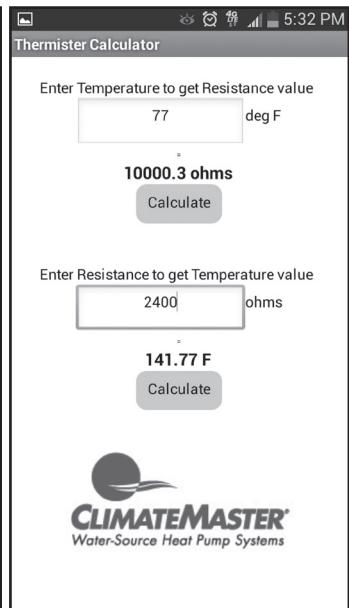

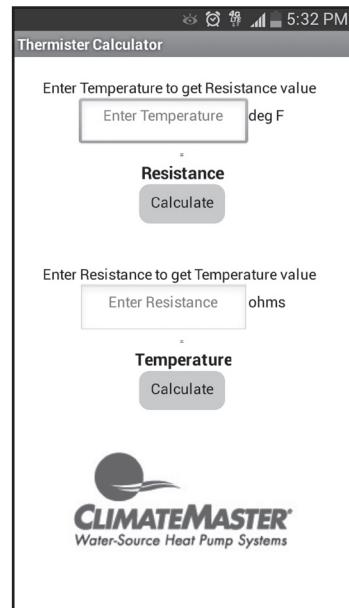

The Trilogy Troubleshooter uses a companion application, the Thermister Calculator (T-Calc is a separate download), so that technicians can quickly convert between temperatures and resistance to troubleshoot temp sensors.

\* Internet/Data connection required to access fault information. The Android app is available at: [https://play.google.com/store/apps/details?id=appinventor.ai\\_soward\\_dane.Triology\\_Troubleshooter](https://play.google.com/store/apps/details?id=appinventor.ai_soward_dane.Triology_Troubleshooter)

### Troubleshooting App

### Thermistor Calculator

## vFlow® Internal Variable Water Flow Control

### vFlow Internal Variable Water Flow

Industry-first, built-in vFlow replaces a traditionally inefficient, external component of the geothermal system (water circulation) with an ultra-high-efficient, variable speed, internal water flow system. This saves homeowners 70-80% on operating water circulator vs traditional single speed pump systems. It saves installers time and labor by avoiding installing bulky external flow centers or flow regulators. Multi-unit installations are also much simpler with vFlow systems, as the units automatically adjust water flow across the system.

vFlow is enabled by iGate, which facilitates intelligent communication between the thermostat, DXM2 control, sensors and internal water pump to make true variable water flow a reality.

#### vFlow delivers three main benefits:

- 1) Easier and quicker unit installation as the flow control is built in to the unit.
- 2) Superior reliability by varying the water flow to deliver more stable operation.
- 3) Higher cost savings by varying the flow (and pump watt consumption) to match the unit's mode of operation.

#### Internal components

Trilogy 45 can be installed more easily and compactly than its predecessors because water-flow components are internal to the unit. It also saves installing contractors labor and time by eliminating the need for an external flow regulator or a bulky external pumping module. Included are variable-speed pump, flushing ports, 3-way flushing valves, and expansion tank.

#### Variable flow

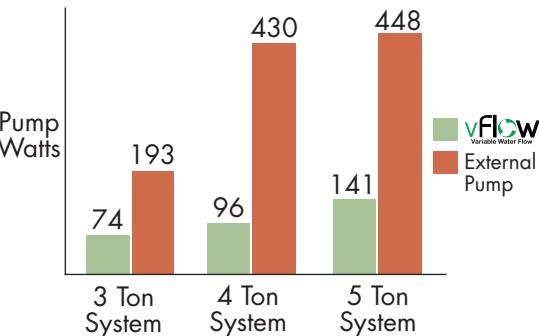

vFlow technology enables variable water flow through the unit, adjusting the pump speed to maintain an installer-set loop  $\Delta T$ . By controlling the water flow, the system is able to operate at its optimal capacity and efficiency. vFlow provides a lower flow rate for part load where units typically operate 80% of the time and a higher, more normal flow rate for full load operation.

### Energy Savings with water circulation control

Units with vFlow deliver higher operating cost savings by varying the water flow to match the unit's operation (ex: lower water flow when unit is in part load operation). Lowering the flow results in lower energy consumption by the water pump (=higher cost savings) in vFlow units (whether internal or external pump).

In closed loop applications, using vFlow with an internal variable-speed (ECM) flow controller, the ECM pump uses fewer watts than a fixed speed (PSC) pump, even at full load (see chart). The ECM pump excels in energy savings in part load, saving 70–80% watts compared to fixed speed pumps (see chart). The ECM pump can operate with independent flow rates for heating and cooling, further saving even more energy.

## Trilogy 45 Design Features

The Trilogy 45 Series is a fully variable system with abundant features and ultra-high efficiency.

### Application Flexibility

- Two Capacities 0930 and 1860 (modulates between 9K - 30K or 18K - 60K Btuh)
- Fully variable/modulating system. Set your desired capacity within capacity range and the unit modulates to hold that capacity across the ENTIRE operating range.
- Entering water temperature operation range (20-120°F EWT) and flow rates as low as 1.5 gpm per ton
- Upflow, downflow, and horizontal right or left return
- Internal (upflow and downflow only) electric heat unit (optional) designed for easy field installation.
- Optional external (horizontal units) electric heat unit designed for easy field installation
- Web-enabled remote access on internet:
  - Homeowner can set setpoints, schedules, vacation, etc. from a smartphone/computer.
  - Dealers can remotely troubleshoot and diagnose units from anywhere through a smartphone, computer or mobile device.
- Standard pre-installed 2" filter frame with 2" high performance MERV 11 pleated air filter
- Integrated vFlow allows a cleaner, compact installation and saves time in installation

### Operating Efficiencies

- Exceeds ASHRAE 90.1 and Energy Star Tier 3 efficiency levels
- EarthPure HFC-410A zero ozone depletion refrigerant.
- Rugged and highly efficient Mitsubishi variable speed compressor (0930 system includes rotary, 1860 system includes scroll) provides ultra-high efficiencies and unsurpassed comfort.
- Brazed plate water-to-refrigerant heat exchangers deliver higher efficiencies in smaller sizes.
- Next generation all aluminum microchannel air coil for high efficiency
- Large low RPM blowers with variable speed ECM fan motors provide quiet, efficient air movement with high static capability. Installer electronically selectable ECM air flow provides the ultimate in comfort optimization.

### Service & Installation Advantages

ClimateMaster's Trilogy 45 series incorporates features that are industry firsts, which make it extremely easy to install:

- Ease of installation:
  - 1) vFlow - with the industry exclusive features, these units are ready to install out of the box with no requirement for external pumps, expansion tanks, or valves for the ground loop, removing a lot of the complexity of installation.
  - 2) Web-enabled iGate: Full digital controls that communicate with the thermostat which allows all unit configuration from the thermostat, PC service tool connected to the unit or through the dealer portal on the internet... the easiest installation setup for any level of installer. Far simpler than the use of dip switches on the unit control board.
- Trilogy 45 only requires 4 wires between the communicating thermostat and the unit. Others require up to 9 or 14 wires for full functionality. This is achieved by leveraging the full power of the microprocessor on the control.
- Internal variable speed circulator includes an internal check valve for multiple unit/ shared loop installations.

- The communicating EXM control board diagnostic and communicating thermostat features allow web-enabled iGate Connect access to performance information on thermostat, PC service tool or dealer portal on internet.
- The two-section swing-out and removable control box design provides wide-open service access to the compressor section. Multiple unit access panels allow technicians to access any side of the cabinet. Service friendly highly accessible high/low refrigerant pressure ports are located on a service bracket at the front of the unit. No other product / manufacturer in the geothermal segment offer this convenience.
- An innovative two-section electrical control box design that tucks the stationary line voltage components safely behind a swing-out low voltage control panel to provide clear service access through the front of the unit. The low voltage panel can even be quickly pulled off the hinges and removed. Harness connections make controller replacement a snap.
- 3/4" MPT condensate connection directly from condensate drain pan eliminates internal plastic drain tubing that is subject to clogging and avoids the need for a fitting that reduces the drain opening size.
- Diagnostic display of system inputs, outputs, and configuration settings at thermostat, PC service tool or on the internet.
- Web-enabled communicating iGate Connect Thermostat only uses the AWC99\*\* thermostat.
- Diagnostic display of system temperatures at thermostat (AWC99\*\*):
  1. Refrigerant circuit:
    - Superheat, Subcool
    - Suction pressure/temperature, discharge pressure/temperature, refrigerant temperature at entering / leaving the source coil and air coil
    - Compressor speed
    - Electronic Expansion Valve operation
  2. Water circuit / loop
    - Entering/ Leaving water temperature
    - Water flow rate
    - Loop pressure
    - Internal Pump speed
  3. Air section
    - Airflow CFM and blower RPM
    - Leaving air temperature
  4. Other information
    - Internal pump speed
- Immediate manual control of all EXM outputs is available at the thermostat (AWC99\*\*) or iGate Connect Service tool or dealer portal for rapid troubleshooting.
- Expansion tank eliminates "flat loop" callbacks by working to maintain steady loop pressure.
- Brass swivel geo connections for quick connection and elimination of wrenches or sealants during installation.
- Intelligent fault retry with history retention.
- Two configurable auxiliary relays for low voltage control of accessories.
- UPS (Unit Performance Sentinel) provides early warning of inefficient operation.

## Trilogy 45 Design Features

### Factory Quality & Industry Certifications

All units are built and factory run tested on our Integrated Process Control Assembly System (IPCS). The IPCS is a unique state of the art manufacturing system that is designed to assure quality of the highest standards of any manufacturer in the water-source industry. Our IPCS system:

- Verifies that the correct components are being assembled.
- Automatically performs special leak tests on all joints
- Conducts pressure tests
- Performs detailed operational test
- Automatically disables packaging for a "failed" unit
- Creates computer database for future service analysis and diagnostics from operational test results
- All refrigerant brazing is done in a nitrogen atmosphere
- All units are deep evacuated to less than 100 microns prior to refrigerant charging
- All joints are both helium and halogen leak tested to insure annual leak rate of less than 1/4 ounce
- AHRI/ASHRAE/ANSI/ISO 13256-1 certified.
- ETL listed.
- US EPA "Energy Star" Tier 3 compliant.

### Advanced Controls

iGate communicating control provides advanced unit functionality and comprehensive configuration, monitoring and diagnostic capabilities through digital communication links with the variable-speed fan motor, variable-speed source pump (or modulating valve) and communicating thermostat or Configuration/Diagnostic tool.

- Temperature sensors/transducers for system protection and control
- Anti-short cycle and over/under voltage protection
- High pressure, loss of charge, and condensate overflow protection
- LED fault and status indication at controller
- Service tool port for optional setup and diagnostics at unit

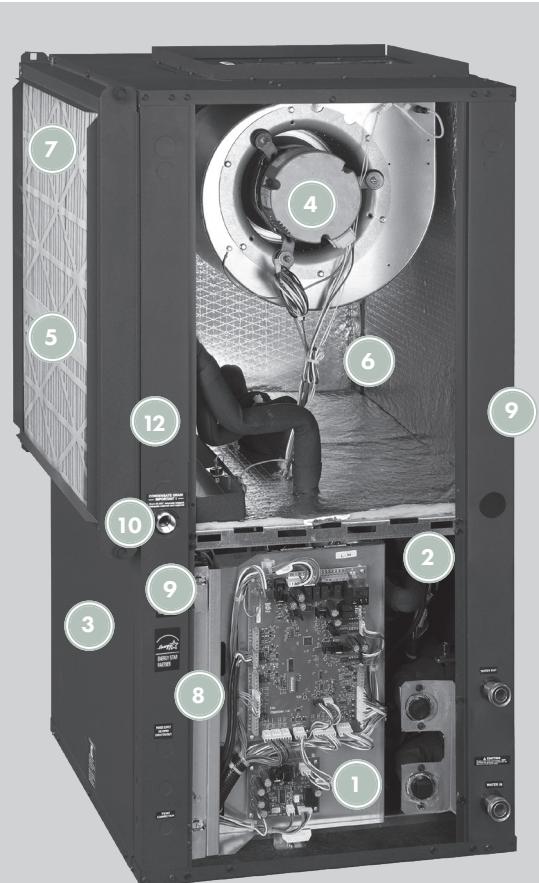

### Field Installed Accessories

- iGate Connect Web-Enabled Communicating, Programmable Thermostat (AWC99\*\*)
- iGate ClimaZone™ Zoning Panel
- Auxiliary Electric Heater
- Earthpure Polarized Media Electric Air Cleaner
- Unit Vibration Isolation Pad
- Unit Stand
- Secondary Drain Pan (Horizontal Units)
- Service tool/cable/software kit (ASVCT00L01).

### Warranty

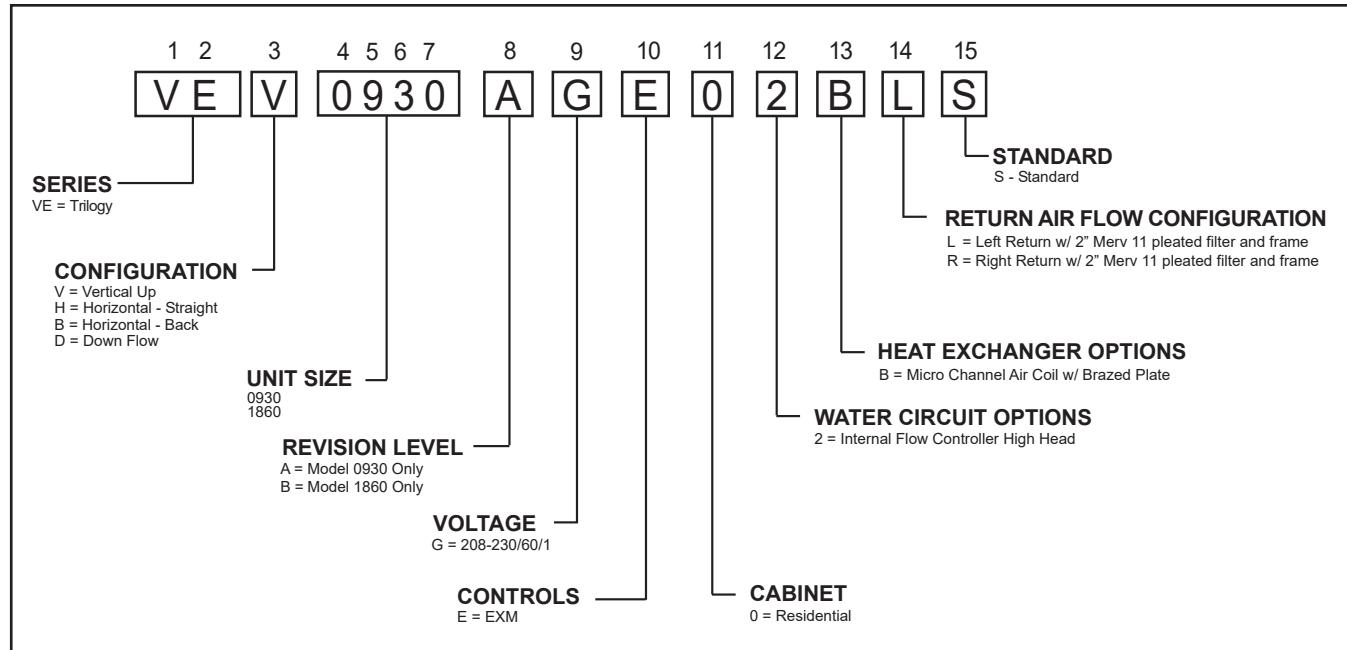

- ClimateMaster residential class heat pumps are backed by a ten-year limited warranty on all unit parts, including the following accessories when installed with ClimateMaster units: Flow Controllers, Thermostats & Electric Heaters.
- ClimateMaster goes even further to back up its commitment to quality by including a service labor allowance for the first five years on unit parts and thermostats, auxiliary electric heaters and geothermal pumping modules.
- The Optional Extended Factory Service Labor Allowance Warranty offers additional length of term protection to the consumer by offsetting service labor costs for 10 years.

- 1** Exclusive iGate Two-Way Communicating Control to configure, monitor and diagnose AT THERMOSTAT/PC SERVICE TOOL
- 2** vFlow Internal Variable Water Flow System with Variable Speed Internal Flow Center for optimized efficiency and reliability
- 3** Mitsubishi Variable Speed Compressor with dual-level isolation for ultra-quiet and high-efficiency operation
- 4** Emerson UltraTech Variable-Speed Communicating Fan Motor with soft start and constant CFM control
- 5** Microchannel Aluminum Air Coils to resist formicary corrosion
- 6** Foil-Faced Insulation in the blower section and fully insulated compressor section conform to ASHRAE 62 specifications
- 7** Two-inch high-efficiency MERV 11 Filter (standard) or EarthPure Air Cleaner for high quality indoor air
- 8** Two-Section Swing-out Control Box design provides wide-open service access
- 9** Heavy Gauge Galvanized Steel Cabinet is epoxy powder-coated in a durable and attractive black matte finish with stainless steel front access panels
- 10** Designed for External P-trap to eliminate internal drain-line cleanouts

**About AHRI/ISO/ASHRAE 13256-1**

AHRI/ASHRAE/ISO 13256-1 (Air-Conditioning and Refrigeration Institute/American Society of Heating, Refrigerating and Air Conditioning Engineers/International Standards Organization) is a certification standard for water-source heat pumps used in the following applications:

- WLHP (Water Loop Heat Pump – Boiler/Tower)
- GLHP (Ground Loop Heat Pump – Geothermal)

The directory at <http://www.ahrinet.org/> is constantly being updated and immediately available on the Internet.

Water and air temperatures used in AHRI certification standards are shown below.

**Test Condition Comparison Table**

	WLHP	GLHP
<b>Cooling</b> Entering Air Temperature - DB/WB °F [°C] Entering Water Temperature - °F [°C] Fluid Flow Rate	80.6/66.2 [27/19] 86 [30] *	80.6/66.2 [27/19] 77 [25] *
<b>Heating</b> Entering Air Temperature - DB/WB °F [°C] Entering Water Temperature - °F [°C] Fluid Flow Rate	68 [20] 68 [20] *	68 [20] 32 [0] *

\*Flow rate is specified by the manufacturer

Data certified by AHRI include heating/cooling capacities, EER (Energy Efficiency Ratio – Btuh per Watt) and COP (Btuh per Btuh) at the various conditions shown above. Pump power correction is calculated to adjust efficiencies for pumping Watts. Fan power is corrected to zero external static pressure using the equation below. The nominal airflow is rated at a specific external static pressure.

- Fan Power Correction =  $(\text{cfm} \times 0.472) \times (\text{esp} \times 249)/300$

Capacities and efficiencies are calculated using the following equations:

- ISO Cooling Capacity = Cooling Capacity (Btuh) + [Fan Power Correction (Watts)  $\times 3.412]$
- ISO EER Efficiency (Btuh/W) =  $\text{ISO Cooling Capacity (Btuh)}/[\text{Power Input (Watts)} - \text{Fan Power Correction (Watts)} + \text{Pump Power Correction (Watts)}]$
- ISO Heating Capacity = Heating Capacity (Btuh) - [Fan Power Correction (Watts)  $\times 3.412]$
- ISO COP Efficiency (Btuh/Btuh) =  $\text{ISO Heating Capacity (Btuh)} \times 3.412/[\text{Power Input (Watts)} - \text{Fan Power Correction (Watts)} + \text{Pump Power Correction (Watts)}]$

## Reference Calculations & Legend

Heating	Cooling
$LWT = EWT - \frac{HE}{GPM \times 500}$	$LWT = EWT + \frac{HR}{GPM \times 500}$
$LAT = EAT + \frac{HC}{CFM \times 1.08}$	$LAT (DB) = EAT (DB) - \frac{SC}{CFM \times 1.08}$
	$LC = TC - SC$
	$S/T = \frac{SC}{TC}$

**CFM/T** = airflow, cubic feet/minute per ton  
**EWT** = entering water temperature, °F  
**GPM** = water flow in US gallons/minute  
**EAT** = entering air temperature, Fahrenheit (dry bulb/wet bulb)  
**HC** = heating capacity, Mbtuh  
**TC** = total cooling capacity, Mbtuh  
**SC** = sensible cooling capacity, Mbtuh  
**KW** = total power unit input, KiloWatts  
**HR** = total heat of rejection, Mbtuh  
**DT** = temperature difference  
**Hz** = hertz  
**HE** = total heat of extraction, Mbtuh  
**WPD** = Water coil pressure drop (ft hd)  
**EER** = Energy Efficiency Ratio = BTU output/Watt input

**COP** = Coefficient of Performance = BTU output/BTU input  
**LWT** = leaving water temperature, °F  
**LAT** = leaving air temperature, °F  
**LC** = latent cooling capacity, Mbtuh  
**S/T** = sensible to total cooling ratio  
**EWTS** = entering water temperature (source)  
**EWTL** = entering water temperature (load)  
**DTS** = temperature difference (source)  
**DTL** = temperature difference (load)  
**LWTS** = leaving water temperature (source)  
**LWTL** = leaving water temperature (load)

## Entering Air Correction Factors

\* pressure drop is less than 1 ft

Interpolation is permissible, extrapolation is not.

Table does not include fan or pump power corrections for AHRI/ISO conditions.

Above performance is based on 70°F db entering air condition.

Above data is based on 15% methanol.

# Trilogy 45 (VE) Series

1860	in cm	3.81 9.7	5.43 13.8	7.18 18.2		

Condensate connection is 3/4" MPT and is located on the air coil side of the front of the unit.  
 Unit shipped with deluxe duct collar/filter frame extending from unit 3" [7.6cm] and is suitable for duct connection.  
 Discharge flange is field installed.

## Service Access – Vertical Upflow Trilogy 45

**Left Return**

**Right Return**

= mandatory 2' service access

= (optional) additional 2' service access

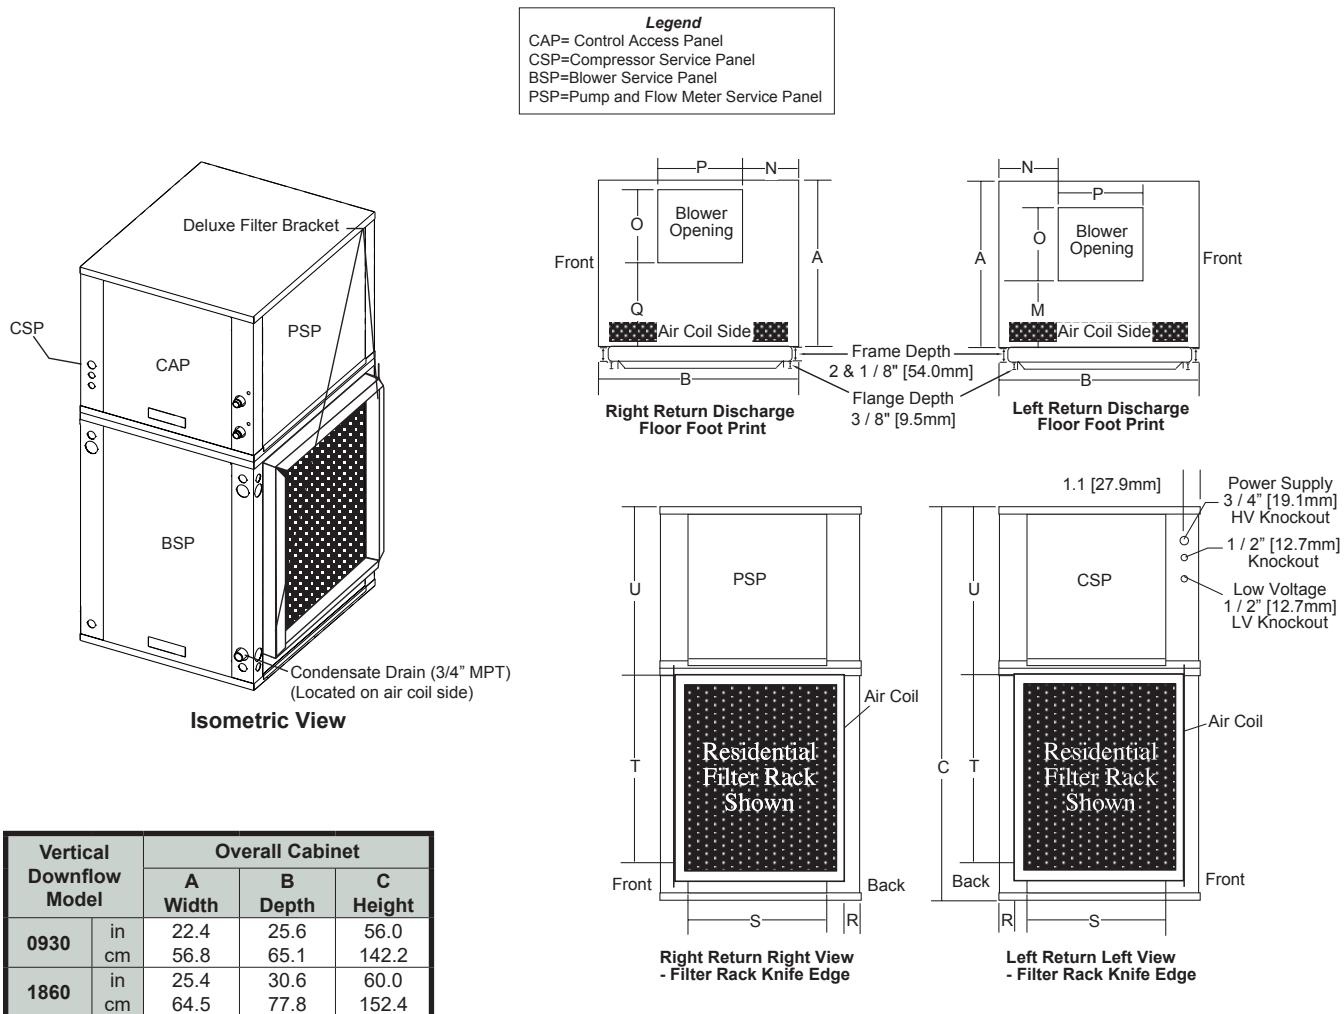

**Notes:**

1. While clear access to all removable panels is not required, installer should take care to comply with all building codes and allow adequate clearance for future field service.
2. Front & Side access is preferred for improved service access. However, side access is not required if it is acceptable to slide the unit forward into the open if a compressor, pump volute, or heat exchanger replacement is required.
3. Top supply air is shown, the same clearances apply to bottom supply air units.

**Legend:**

CAP = Control/Compressor Access Panel  
 BSP = Blower Service Panel  
 CSP = Compressor Service Panel  
 PSP = Pump and Flow Meter Service Panel

## Dimensions – Vertical Downflow Trilogy 45

Condensate connection is 3/4" MPT and is located on the air coil side of the front of the unit.  
 Unit shipped with deluxe duct collar/filter rack extending from unit 3" [7.6cm] and is suitable for duct connection.  
 Downflow unit does not have discharge flange, and is rated for zero clearance installation.

## Service Access – Vertical Downflow Trilogy 45

**Left Return****Right Return**

= mandatory 2' service access

= (optional) additional 2' service access

**Notes:**

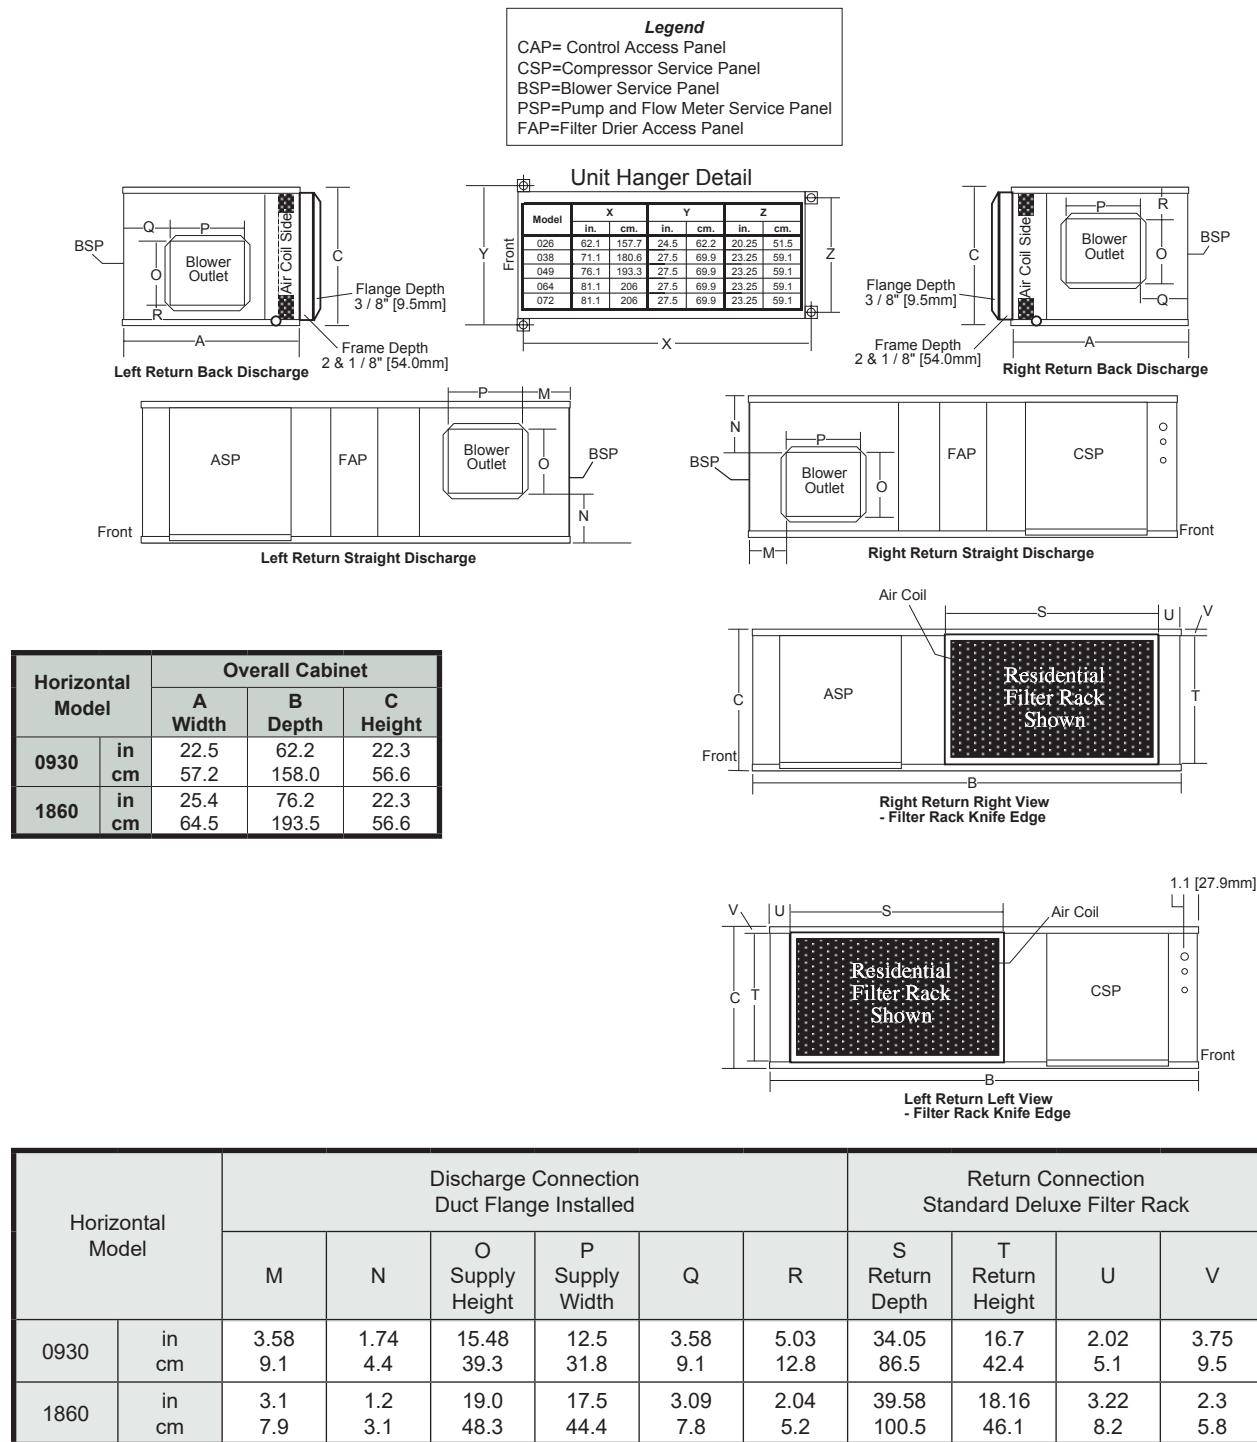

1. While clear access to all removable panels is not required, installer should take care to comply with all building codes and allow adequate clearance for future field service.
2. Front & Side access is preferred for improved service access. However, side access is not required if it is acceptable to slide the unit forward into the open if a compressor, pump volute, or heat exchanger replacement is required.
3. Top supply air is shown, the same clearances apply to bottom supply air units.

**Legend:**

1860	in cm	3.81 9.7	5.43 13.8	7.18 18.2

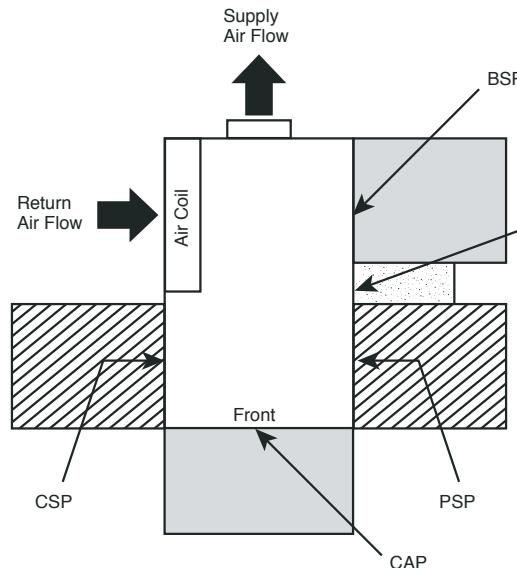

Condensate is 3/4" MPT.

Unit shipped with deluxe duct collar/filter rack extending from unit 3" [7.6cm] and is suitable for duct connection. Discharge flange and hanger brackets are factory installed.

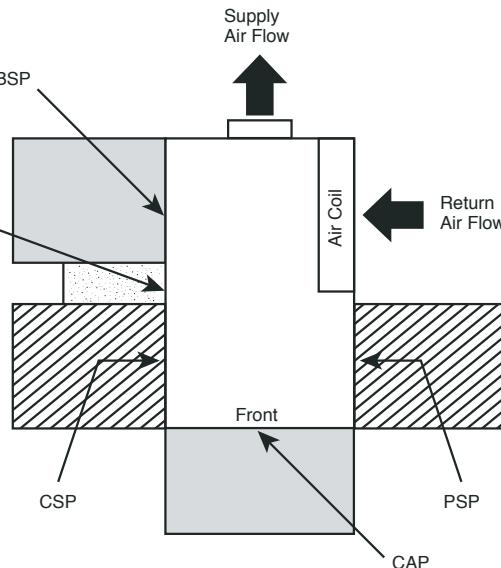

# Trilogy 45 (VE) Series

## Service Access – Horizontal Trilogy 45

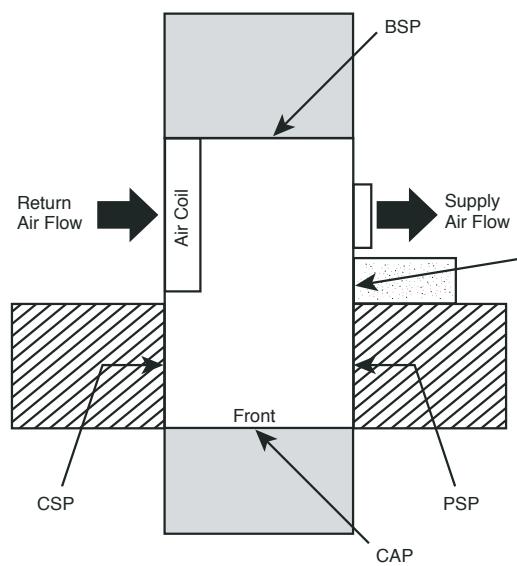

**Left Return Back Discharge**

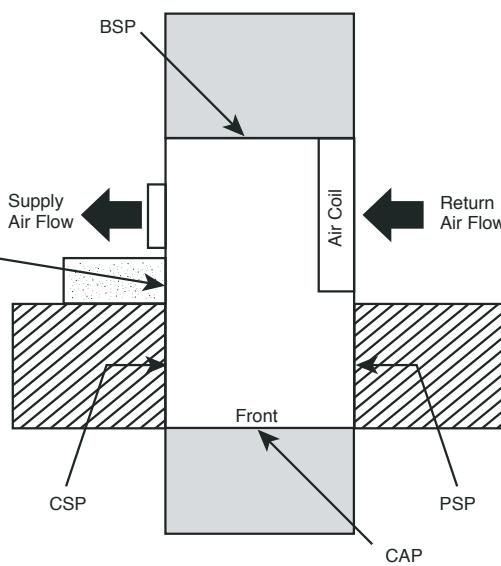

**Right Return Back Discharge**

**Left Return Straight Discharge**

**Right Return Straight Discharge**

### Notes:

1. While clear access to all removable panels is not required, installer should take care to comply with all building codes and allow adequate clearance for future field service.
2. CCP and BSP requires 2' service access.
3. Blower service access is through back panel on straight discharge units or through panel opposite air coil on back discharge units.
4. Side access is not required if it is acceptable to drop the unit if major service such as compressor, pump volute, heat exchanger, or filter drier replacement is required.

[Light Gray Box] = mandatory 2' service access

[Hatched Box] = (optional) additional 2' service access

### Legend:

CAP = Control Access Panel  
 BSP = Blower Service Panel  
 CSP = Compressor Service Panel  
 PSP = Pump and Flow Meter Service Panel  
 FAP = Filter Drier Access Panel

Airflow is controlled within 5% up to the Max ESP shown with wet coil

## Pump Curves Data

**High Head Variable Pump with Check Valve**

## Auxiliary Electric Heat

### Auxiliary Heat Ratings

Auxiliary Electric Heat Model	VE Models		kW Rating		Btuh Rating		Minimum CFM Required
	0930	1860	240V	208V	240V	208V	
AGM4A			3.8	2.9	13000	9900	500
AGM5A			4.8	3.6	16300	12300	500
AGM8A			7.6	5.7	25900	19400	650
AGM10A			9.6	7.2	32700	24600	650
AGL4A			3.8	2.9	13000	9900	500
AGL10A			9.6	7.2	32700	24600	1300
AGL15A			14.4	10.8	49100	36900	1350
AGL20A			19.2	14.4	65500	49200	1350

Black area denotes compatibility

Note: Horizontal units rated for zero clearance unit and 1" clearance for the first three feet of duct,  
Vertical units rated for zero clearance for both unit and duct.

### Auxiliary Heat Electrical Data

Auxiliary Electric Heat Model	Supply Circuit	Heater Amps		Minimum Circuit Amps		Maximum Fuse	
		208 V	230 V	208 V	230 V	208 V	230 V
AGM4A	Single	13.7	15.1	17.1	18.9	30	30
AGM5A	Single	17.3	19.2	21.6	24.0	30	40
AGM8A	Single	27.4	30.3	34.3	37.9	60	60
AGM10A	Single	34.7	38.3	43.4	47.9	70	80
AGL10A	Single	34.7	38.3	43.4	47.9	70	80
AGM12A	Single	41.1	45.4	51.4	56.8	90	100
	Dual - L1/L2	27.4	30.3	34.3	37.9	60	60
	Dual - L3/L4	13.7	15.1	17.1	18.9	30	30
AGL15A	Single	52.0	57.5	65.0	71.9	100	100
	Dual - L1/L2	34.7	38.3	43.4	47.9	70	80
	Dual - L3/L4	17.3	19.2	21.6	24.0	30	40
AGL20A	Single	69.3	76.6	86.6	95.8	150	150
	Dual - L1/L2	34.7	38.3	43.4	47.9	70	80
	Dual - L3/L4	34.7	38.3	43.4	47.9	70	80

All heaters rated single phase 208/230 V 60 Hz

All Fuses UL Class K general purpose

All models 12 kW or larger feature internal circuit breakers

## Accessories, Options, and Warranty

### Accessories & Options

#### **iGate Connect web-enabled thermostat**

The iGate Connect (AWC99\*\*) is the industry's first communicating web-enabled thermostat that allows dealers to monitor performance and make configuration changes from anywhere using a web enabled device like a computer, Smart Phone or tablet. iGate Connect also offers homeowners access to their thermostat on the internet to perform tasks like changing set-points, schedules, schedule vacation, set reminders and view alerts. The system also emails alerts and reminders to homeowners and dealers.

iGate Connect (AWC99) is the ONLY thermostat compatible with the Trilogy system.

AWC99 is a programmable variable-stage auto-changeover electronic digital thermostat and offers completely variable operation of the Trilogy heat pump.

#### **iGate ClimaZone™**

This optional addition to the Trilogy 45 is a zoning system (AZC06CAR) that allows a single unit to be controlled by multiple iGate Connect thermostats, conditioning the home in smaller zones instead of a single large zone. The Trilogy system accommodates six zones with a single zone panel or up to twelve zones with the addition of a second panel. With zoning a home is more comfortable and the HVAC system more efficient by directing conditioned air only when and where it is needed giving the homeowner complete control over their cooling and heating. System configuration and diagnostics are available via the Trilogy PC service tool.

#### **Auxiliary Heater (field installed)**

An optional, internal, field-installed electric heater provides supplemental and/or emergency heat capability when used with the three stage heating thermostat. (Heater is externally mounted on horizontal units).

### Warranty Information

ClimateMaster residential class heat pumps are backed by a ten-year limited warranty on all unit parts, including the following accessories when installed with ClimateMaster units: Flow Controllers, Thermostats & Electric Heaters.

ClimateMaster goes even further to back up its commitment to quality by including a service labor allowance for the first five years on unit parts and thermostats, auxiliary electric heaters and geothermal pumping modules.

See ClimateMaster's 2010 Limited Express Residential Warranty Certificate RP851 for specific coverage and limitation.

The Optional Extended Factory Service Labor Allowance Warranty offers additional length of term protection to the consumer by offsetting service labor costs for 10 years.

To order this warranty, contact your ClimateMaster distributor. This coverage must be purchased within 90 days of unit installation. See Limited Express Extended Labor Warranty Certificate RP852 for details.

Notes:

# Trilogy 45 (VE) Series

## Revision History

Date	Page #	Description
22 May, 2024	Various	Updated decoder, graphics, tables, terminology, and diagrams
	48	Updated Customer Experience phone number and title
22 Dec., 2021	38	Updated Electrical Data for 1860 Revision B, moved Unit Airflow Configurations to separate page
29 Nov., 2021	16, 17, 49, 50	Minor edits, Updated Decoder, insertion of revised diagrams
30 Sept., 2021	8, 11, 12	Added iGate2 and myUplinkPRO information
23 June, 2021	20-27	Added Compressor Speed %
17 Feb. 2021	28, 38, 40	Updated tables
28 Oct., 2019	16	Updated Decoder
20 Sept. 2019	Pg. 41	Updated Pump Curve Data
18 Sept. 2019	Various	Insert new diagram edits
5 Sept. 2019	All	First Published
